

MATERIALS

Here at Reginox we have a continual program of innovation in regard to the materials used in the manufacturing of granite sinks and also a strong focus on eco sustainability principles. In the endless pursuit of excellence and with unending research Reginox had created a world class selection of materials to offer to you the customer. Please see below for more details on the amazing range of materials available to you when you purchase an Elite granite sink from Reginox.

SYNTEQ

Our experience and innovative technology have helped us to create the Synteq material which redefines the standards for composite sinks. It is recognisable by its ease of cleaning with a smooth surface and sleek models, help to provide high resistance to thermal shock and impact, abrasion and UV radiation. With its vivid, deep and intense colour finish, it provides the perfect high quality addition to any kitchen. With a zero-porous water and stain repellent surface, Synteq ensures resistance to staining agents. Our Synteq sinks are a must have for your kitchen.

SOFT TOUCH:

An ultra-compact, smooth and soft surface with an excellent structural core for a new tactile experience. With a non-porous composition, they are not only durable but sustainable and safe.

HD COLOURS:

100% high definition for an incredible visual experience with intense matte colours. From optical white to matte black and light grey, each Synteq colour is pure, intense and deep.

FAST CLEAN:

Living the everyday has never been so exciting thanks to an innovative and exclusive material extremely easy to clean. Synteq is NSF certified and is suitable for contact with food. Alluring, hygienic and easy to clean, it is a material where every micro-particle counts.

ALTEQ

Our Alteq range of sinks are made from a composition of natural granite and acrylic resin, made to exploit the natural essence of quartz in the kitchen. Created through a specialized process, using fully coloured granite particles our Alteq sinks are timeless, durable and versatile, with a high resistance to shock and temperature changes. Our 3 easy to clean models are suitable for food contact and available in our classic white and cream colours, their textured surface combines the appearance of natural stone and performance. And, also available in our black

spek and titanium spek, with metal particles to give an added dimension to the appearance and finish with a metallic effect.

NATURAL APPEAL:

The metallic textures of black spek and titanium spek make the material particles stand out adding a feature to your kitchen. Or the white and cream finish provide the surfaces with a natural stone classic aesthetic.

QUARTZ RESISTANCE:

A material that brings out the best technical qualities of quartz: high resistance to high temperatures and to the most violent shocks.

TIMELESS BEAUTY:

With a timeless design and strong quartz combination, Alteq is the perfect combination of strength and versatility making it a durable and beautiful product that will stand the test of time.
